Historical profit does not guarantee future profit. Priority thresholds are project assumptions.

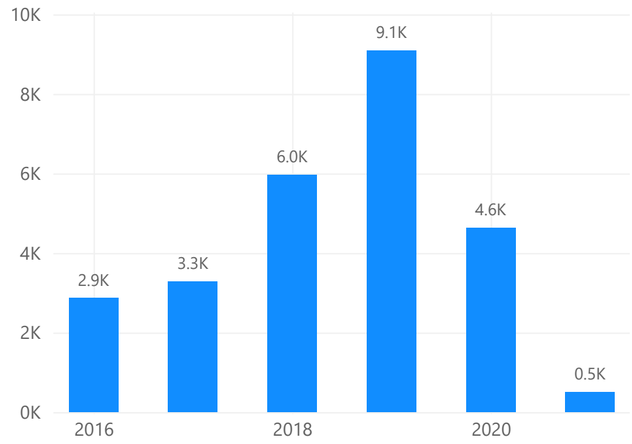

Sales Performance

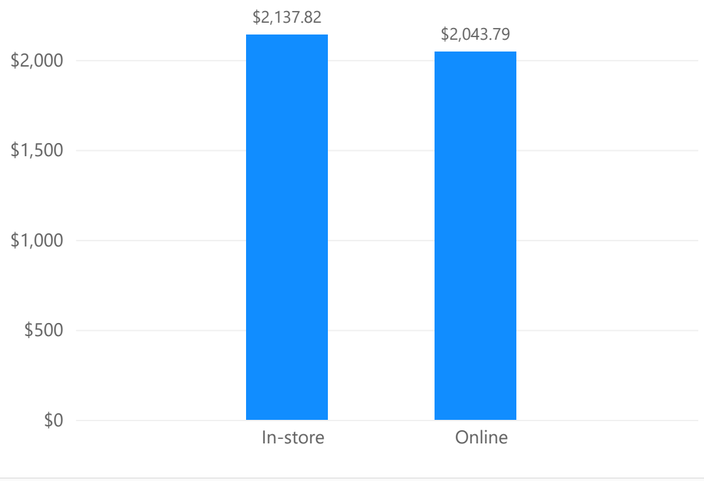

Revenue by Year (2021 through February).

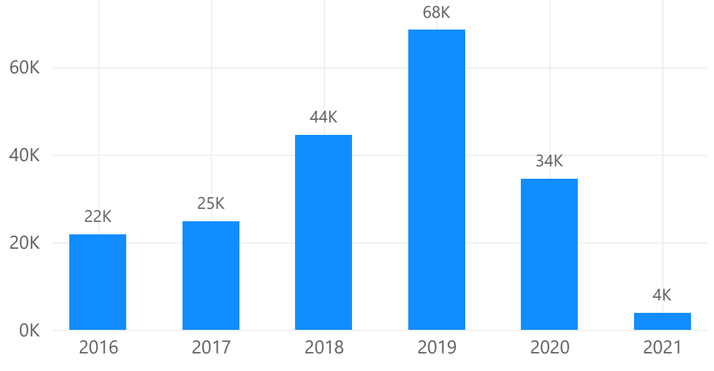

Orders by Year(2021 through February)

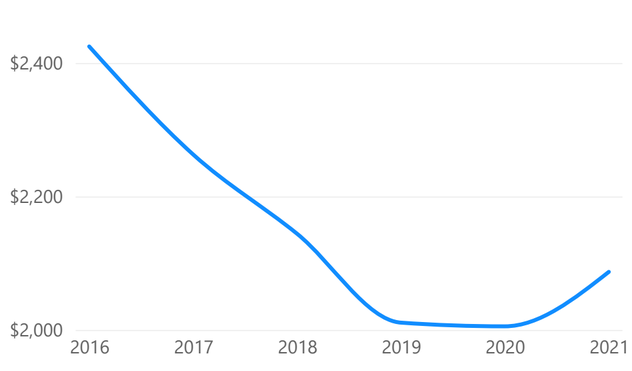

Average Order Value: Online vs. In-Store

Units Sold by Year(2021 through February)

Average Order Value by Year

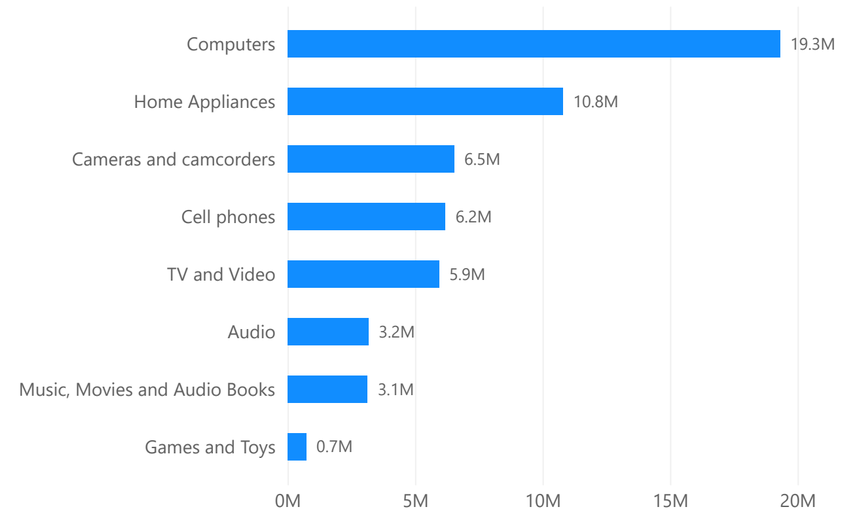

In-store orders averaged $2,138, compared with $2,044 online. That's **$94 more per order**, or about **4.6% higher** for in-store orders in this dataset.

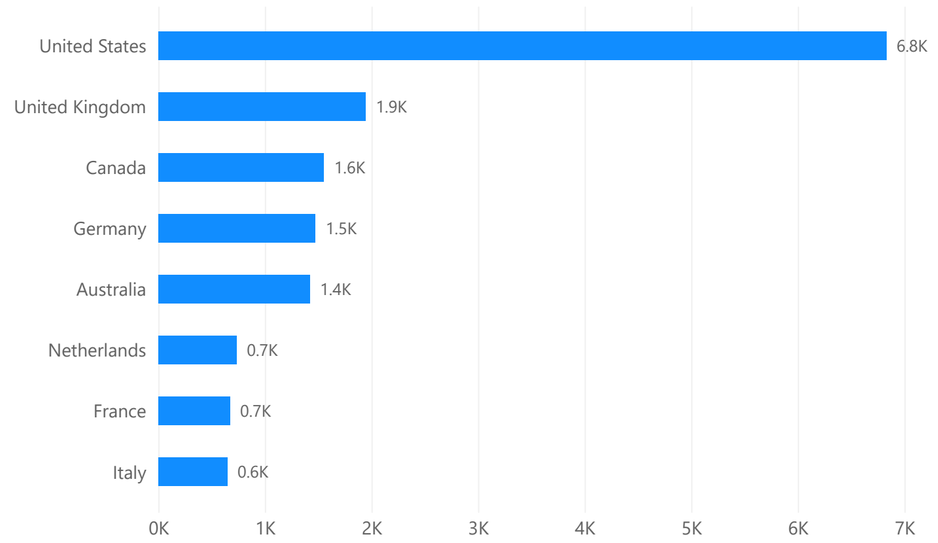

2021 data covers January–February only, so it is not directly comparable with full years. This caveat applies to all four yearly charts.
